PRODUCT DESCRIPTION

Height Clearance Bars are great for giving you that extra guidance where low clearance is an issue. Our Height Clearance Bars are constructed from aluminium which is super light weight that you can install yourself and won't rust.

Things to Consider:

- Nominate your clearance in the dropdown options above, if the number you are after is not there please specify it in the comments section at checkout.
- Custom text available upon request

  Note: We can't do two decimal points. It has to be either no decimal point (3.0) or one decimal point (3.5).
